>> Works with MIFARE RFID cards (13,56 MHz)

>> Optional model working with any card available

Lux Series Key Card Holder

FX-CHSW-M-A-Wh-lux is a stylish hotel card holder that switches electrical circuits on or off when a valid key card is inserted / removed. FX-CHSW-M-A-Wh-lux uses Mifare RFID technology for key card identification. Card Holder is activated by hotel key cards and turns electrical circuits on or off when a key card is inserted or removed from slot. This assures that when guests are not in their room, energy will not be wasted on lights or appliances left on. The key card holder only works with a dedicated Mifare card that is programmed to work with the reader. Card Holder can control electrical loads up to 16A directly connected to it. In addition to it key card holder can be a part of the Fidelix Guest Room Management system which can be used to define various guest room situations.

Technical features

Color:	White (button part) , 7 different styles for frames
Dimensions:	86x86x42mm (WxHxD)
Operating Voltage:	190~240VAC 50Hz
Maximum load current:	Control output 16A
Power Dissipation:	<0.2W
Connection:	Screw connectors
Switch Type:	1-pole, 1-way (Make Contact)
Operating Temperature:	-10°C - 60 °C
Operating Humidity:	10~95%RH
Egress time delay:	20seconds
Lifetime:	More than 100,000 times for use while full load under 220V
Manufacturing Process:	ISO9001
